

Pentest Companies

For the pentest assignment we require a company to perform the pentest on. Below there are two companies we have in mind:

Jeans Centre

Jeans Centre is a clothing company who specializes in denim Jeans. In 2024 they almost have 100 stores. The reason for choosing this company is because we have direct contact with the owner of the company. They use an online web shop that might need some improvement.

The headquarters of the company is in Albasserdam. There is where the owner of Jeans Centre mostly spends his time.

John works parttime at the jean centre and occasionally sees the owner when he visits the store he is working in. The name of the owner is Peter. He is very social and open-minded, so working with him might be a good opportunity.

Den Ouden Groep

Den Ouden Groep is a company specializing in a range of services within the fields of civil engineering, soil- and waste management, organic soil improvement, and infrastructure development. Den Ouden Groep operates through multiple subsidiaries and the main ones are:

- Den Ouden Infra, which is road/infrastructure construction;
- Den Ouden Bodac, specializes in archaeology and clearance of unexploded ordnance;
- Den Ouden Brabob, specializes in soil remediation and treatment of contaminated land;
- Den Ouden Organic, which specializes in organic soil improvement and bio-based solutions;
- Den Ouden GrowSolutions, focuses on sustainable plant growth and soil health through the development and supply of tailored products and services.

The headquarter is in a small town in the province of North-Brabant, Schijndel. The contact person for this pen test is most likely going to be the IT manager of the company.
